About Me

Hi! My name is Cezar Iancu

I have been a full-time codecool student for about a year.

I am a composer and a piano teacher, so it is pretty clear i didn't have any previous experience in coding before Codecool

ABOUT THE APP

4N!TURE is an online eCommerce web-application, where users can browse products, add them into a shopping cart, checkout items and make payments.

Tools used

For the development of this project i used a java-spring boot for the server and React-Tailwind for front-end

Back-end

Java-Spring-boot
Spring Security
Hibernate
Java Mail

Front-end

React
Tailwind css
Custom Hooks
Context Api

Other tools

Git
Vs Code
IntelliJ
Postman

Simple design for a great user experience

4!NITURE is mobile friendly. It has a minimalistic and intuitive design, all for a simpler and better user experience

4!NITURE
